

# Royalty Holding Token

## Whitepaper

The whitepaper is viewed as a functioning record and will be refreshed as and when needed in accordance with the most recent turns of development.

# About

Royalty Holding Token is a token proposed by Royalty Holding Company as a first of its kind, merging of capital markets and cryptocurrency.

Historically, companies would need to spend hundreds of thousands, in some cases hundreds of millions of dollars in order to be listed on a stock exchange (OTC, NYSE, Nasdaq). With this token, we are trying to bridge the gap, in a proof of concept, potentially allowing small businesses to access capital markets and bypass traditional held procedures, taking IPO power away from large financial institutions and giving it to the average person.

# Tokenomics

## (1) Total Supply: 100,000,000

We chose to have a very small supply, this is to create volatility in the token which will be important in later stages of this document. More buys and sells will create more capital for the corporate wallet.

## (2) Circulating Supply: 100,000,000

Initially will be released on the BNB smartchain, audited and vetted. If the project is successful, the token will be moved to its own dedicated blockchain to make voting, distributions, and management easier.

## (3) Buy and Sell Tax 1%

- Tax is set low as to not create a barrier in buys and sells, especially as the token prices rise. This low tax will hopefully encourage bigger investments and should also create liquidity in the marketplace allowing for low slippage.
- Taxes will be sent to a dedicated and transparent wallet hereto referred to as the “corporate” wallet, all transactions in and out of the corporate wallet will be available to users of the token website.
- USDT will then be converted to USD and used to purchase investments in the name of Royalty Holding Company.

# Investing Pool

Investing of the tax will be done in a conservative to medium risk manner. While the fund is building capital the diversification may not follow these exact specifications, but once a certain dollar amount is reached, the following allotment will be used unless voted to change by the stakers of the token.

## (1) 50% Stocks:

Stocks purchased must adhere to the following guidelines:

- Must be tradeable on a large exchange (NYSE, Nasdaq, or AMEX)
- Must allow daily, weekly, or monthly option contracts

## (2) 10% CDs & Bonds

CDs & Bonds must adhere to the following guidelines:

- Must be tradeable before maturity
- Must be A grade or higher

## (3) 10% Real Estate

Real estate must adhere to the following guidelines:

- Property must not be in distress
- Must be leasable without more than a 10% additional investment
- Must be within a days travel of property management

## (4) 10% Royalty Producing Assets

The following items can fall within this category

- Music
- Games
- Mineral Rights
- Timber Rights
- Patents

## (5) 10% Cryptocurrency

90% of cryptocurrency investments must be made into the top 5 cryptos

- 10% of cryptocurrency investments must be speculative or meme coins

## (6) 10% Businesses

Businesses must adhere to the following guidelines

- All financials must be available before investment
- After due diligence, it must be concluded that the business has turned a profit in at least the previous one year
- Stakeholders must have a 75% yes vote

# Distribution

Distribution procedures may change as we explore this endeavor, but as of right now the procedure will work as follows.

Every day during the week, there will be a video or livestream posted on Youtube, showing the trades, talking about anything happening with the portfolio, etc.

Every week on Friday, the weekly profits will be calculated, the allocation for the profits occurs as follows:

- 50% Redistributed to shareholders as USDT
- 35% State and Federal taxes
- 10% Administrative
- 5% Reinvested into portfolio

Every Sunday, rewards will be available for holders to claim through our website.

# DAO & Tax implications

Distribution procedures may change as we explore this endeavor, but as of right now the procedure will work as follows.

It is the end goal to be able to have the ability for token holders to vote on how the tax money is spent.

Consult your tax advisor.
